

UNIVERSIDADE FEDERAL DE SANTA CATARINA
CENTRO DE CIÊNCIAS DA SAÚDE
PROGRAMA DE PÓS-GRADUAÇÃO EM GESTÃO DO CUIDADO EM
ENFERMAGEM - DOUTORADO PROFISSIONAL

SEMESTERS 2020-2

This Teaching Plan is adapted, on an exceptional and transitory basis, to replace face-to-face classes with classes in digital media (non-face-to-face), while the new coronavirus/COVID-19 pandemic lasts, in compliance with Ordinance MEC 544 of June 16, 2020, June 2020 and Resolution 140/2020/CUn, July 24, 2020, as requested in a document sent by the CCS.

I. DISCIPLINE IDENTIFICATION

| CODE | NAME OF DISCIPLINE |
|--|--|
| ----- | Methodological Research Construction and a Validation of Instruments (Elective). |
| Workload: 30 hours | Theoretical Credits: 2 |
| TIMETABLE: 14:00 – 18:00 pm (fortnightly) – Tuesday afternoon or evening. Note: Forecast of synchronous moments from 14:00 to 16:00 hours and asynchronous moments from 16:15 to 18 hours. | |
| PLACE: Moodle of the discipline (virtual room made available on UFSC moodle) or via rpn web conference. | |

II. MINISTERING TEACHER

Dra. Kátia Cilene Godinho Bertoncello E-mail: kbertoncello@yahoo.com.br
Discipline Coordinator

III. COURSE DISCIPLINE

(X) OPTIONAL

1. ACTION LINES

- Health and Nursing Technology.
- Health and Nursing Management and Management.
- Care and the Process of Living, Being Healthy, Sick and Dying.

IV. MENU

Research carried out by nurses concerning techniques and methods to implement projects and to document information, including methods of interviewing patients, collecting data, and forming inferences. The concept includes exploration of methodological issues such as nurses subjectivity and nurses experience. Construction and validation of instruments to be used in research, teaching and clinical practice. Use of the theoretical and quantitative approach for building instruments. Presentation of theoretical, empirical and analytical methods for validation. Discussion of the methods of clinical validation of instruments.

V. OBJECTIVES

- Research carried out by nurses concerning techniques and methods to implement projects and to document information.
- Research methods of interviewing patients, collecting data, and forming inferences.
- The concept includes exploration of methodological issues such as nurses subjectivity and nurses experience.
- Discuss the process of building instruments, highlighting the theoretical and quantitative approach.
- Know the theoretical, empirical and analytical methods for validating instruments.
- Discuss the method of cross-cultural validation of instruments.

- Discuss the method of clinical validation of instruments.
- Provide theoretical and practical discussion on the construction and validation of instruments.

VI. PROGRAM CONTENT

- Research carried out by nurses concerning techniques and methods to implement projects and to document information, including methods of interviewing patients, collecting data, and forming inferences.
- The concept includes exploration of methodological issues such as nurses subjectivity and nurses experience.
- The process of building instruments, highlighting the theoretical and quantitative approach.
- Theoretical, empirical and analytical methods for instrument validation.
- Method of cross-cultural validation of instruments.
- Method of clinical validation of instruments.
- Practical theoretical discussion on the construction and validation of instruments.

VII. PROGRAM TEACHING/DEVELOPMENT METHODOLOGY

- The course will be developed using pedagogical techniques, which stimulate students' critical reflection, regarding the construction of instruments, as well as the rigor of their validation.
- The seven planned meetings were organized to stimulate students, regarding theoretical discussions, as practical exercises.
- Thus, dialogue classes will be used, based on previous readings and presentation of seminars by students.
- In addition to the references defined in this plan, others may also be included, according to the need for the meetings, and it is also recommended to consult the databases in the area, and in the publications of Revista Texto e Contexto de Enfermagem.

Note: The contents, activities and methodologies to be used will be disclosed at least seven days in advance in the discipline's moodle.

VIII. SCHEDULE

| Date/Time/Place: CCS | ACTIVITY/CONTENT | METHOD/ Responsible | PREVIOS READING |
|--|--|---|--------------------|
| 08/12/2020 14:00-18:00 Course Moodle | Presentation of the teaching plan, students and teacher. Research carried out by nurses concerning techniques and methods to implement projects and to document information, including methods of interviewing patients, collecting data, and forming inferences. | Phd. Kátia Bertoncello Synchronous class Recorded video lesson Synchronous class Recorded video lesson | 1; 2; 3; 4. |

| | | | |
|--|--|---|-----------------------|
| 22/12/2020 14:00-18:00 Course Moodle | Nursing methodological research proposal exercise | Phd. Kátia Bertoncello Asynchronous activity | |
| 09/02/2021 14:00-18:00 Course Moodle | The concept includes exploration of methodological issues such as nurses subjectivity and nurses experience. The process of building instruments, highlighting the theoretical and quantitative approach. | Phd. Kátia Bertoncello Synchronous class Recorded video lesson | 5; 6; 7; 8; 9. |
| 23/02/2021 14:00-18:00 15:30- 18:00 Course Moodle | Theoretical, empirical and analytical methods for instrument validation. | Phd. Kátia Bertoncello Synchronous class Recorded video lesson | 10; 11; 12; |
| 09/03/2021 14:00-18:00 Course Moodle | Method of cross-cultural validation of instruments. Method of clinical validation of instruments. | Phd. Kátia Bertoncello Synchronous class Recorded video lesson | 13; 14; 15; |
| 23/03/2021 14:00-18:00 Course Moodle | Nursing methodological research proposal exercise | Phd. Kátia Bertoncello Asynchronous activity | |
| 30/03/2021 14:00-18:00 Course Moodle | Practical theoretical discussion on the construction and validation of instruments. Delivery of the final work of the discipline. | Phd. Kátia Bertoncello Synchronous class Recorded video lesson | 16; 17; 18. |

IX. EVALUATION METHODOLOGY

Proposal for methodological research in nursing - Weight 8.

Participation in activities - Weight 2.
